

## Singapore Airlines to Increase Amsterdam Frequencies Dear Travel Partner,

Singapore Airlines' frequencies on the Amsterdam-Singapore route will increase to 10 weekly between August and October 2026, up from the current daily services

- SIA is committed to deepening connectivity to Amsterdam, and will seek opportunities to increase frequencies beyond October 2026
- Additional Amsterdam flights build on launch of new Madrid service, and increased frequencies to Manchester, Munich, Milan, and London Gatwick
- These flights will enable SIA to meet strong demand from customers for additional seamless options between the Asia-Pacific region and Europe

Singapore Airlines (SIA) will increase flight frequencies between Amsterdam and Singapore to 10 weekly services between 1 August and 22 October 2026, up from the current daily services, in response to strong demand for travel between the Asia-Pacific region and Europe.

Subject to regulatory approvals, flight SQ333 will depart Amsterdam on Tuesdays, Thursdays, and Saturdays at 2035hrs (local time). The return flight, SQ334, will depart Singapore for Amsterdam on the same days at 1110hrs (local time).

For travelers heading out of Amsterdam, SQ333 connects beautifully with a wide array of afternoon and evening departures out of Singapore. This includes seamless daily onward connections to Phnom Penh (KTI), Phu Quoc (PQC), Ho Chi Minh (SGN), Bangkok (BKK), Bali (DPS), Koh Samui (USM), Auckland (AKL), Perth (PER), Medan (KNO), Penang (PEN), and Melbourne (MEL). For travelers heading into Amsterdam, our flights out of Melbourne

(MEL), Brisbane (BNE), Perth (PER), Auckland (AKL), Jakarta (CGK), and Bali (DPS) connect well to SQ334.

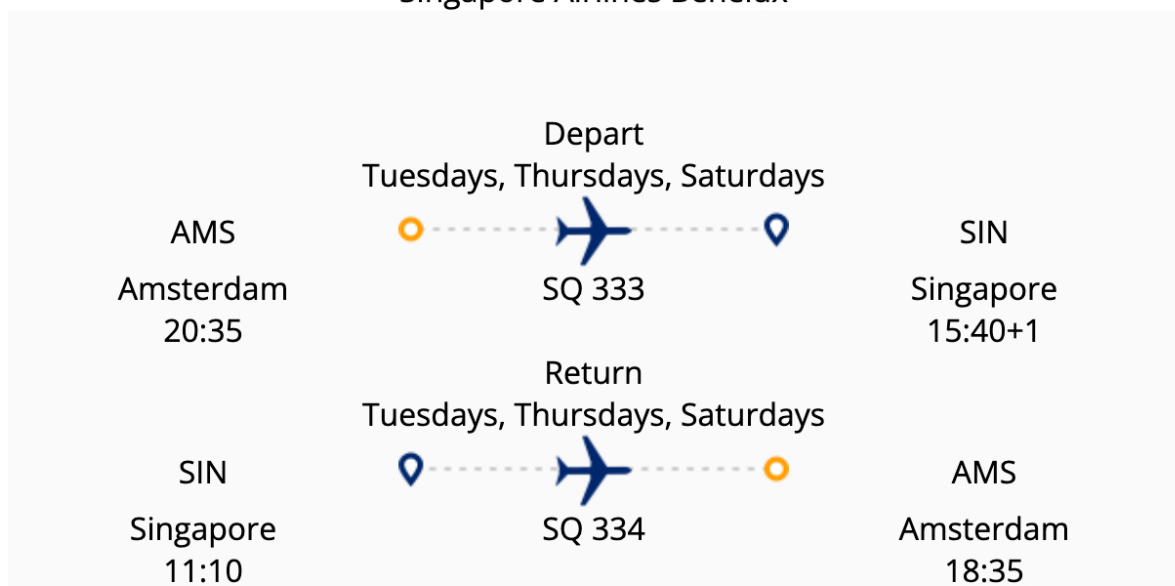

Mr Dai Haoyu, Senior Vice President Marketing Planning, Singapore Airlines, said: "Amsterdam has an important role in our broader European network. Through our Singapore hub, we connect travellers from the Asia-Pacific and beyond seamlessly, helping to meet the strong demand on this route. This increase in frequencies reflects our confidence in the route's long-term potential, and we will seek opportunities to extend it beyond October 2026."

The increase in services to Amsterdam builds on SIA's recent European network enhancements. These include a new five-times-weekly service to Madrid via Barcelona, increased services to Manchester and Milan to daily, increased services to Munich to 10-times weekly, as well as increasing frequencies to London Gatwick to make it a double-daily operation.

Together, these developments support the growing demand for travel and further strengthen connectivity through Singapore, providing customers with greater choice and improved onward connections across Europe.

Tickets for the additional services to Amsterdam are now on sale via SIA's distribution channels.

Kind Regards,  
Singapore Airlines Benelux
